

● LIVE ON THE APP STORE

The AI operating system for home care agencies.

Record the visit. PALM writes the rest.

Seed Round · \$250K

Muse Ibrahim · Founder & CEO · invest@palmtai.com

PROBLEM

Home care still runs on paperwork and disconnected tools.

**Up to 60% of staff time lost to admin**

Documentation, billing, and manual paperwork eat the workday after every single visit.

**Days from assessment to signed contract**

Proposals and contracting drag for days. The agency that puts an agreement in front of the family first usually wins.

**3 to 5 disconnected tools per agency**

Legacy home care CRMs don't talk to billing, scheduling, or clinical records, so owners fly blind.

**Billing errors bleed revenue**

Claim denials and missed billables cost agencies thousands every month and add compliance risk.

SOLUTION

The visit itself becomes the paperwork.

- ✓ **AI voice assessments**
Tap record. Live transcription and speaker ID run in the field. No forms, no laptops.
- ✓ **Automated documentation**
Transcript, billable items, and clinical SOAP notes generated from the conversation itself.
- ✓ **50-state compliant contracts**
A service agreement built on your state's contract rules, drafted in minutes and ready to sign.
- ✓ **Home-care CRM built in**
Clients, pipeline, payer types, team, and scheduling in one platform with complete visibility.

● SHIPPED · IN MARKET NOW

Not a prototype. It's live.

Live

on the App Store

Subscriptions via Apple, 14-day free trial, no card required.

Minutes

from visit to contract

Full AI pipeline in production: transcribe → billables → notes → contract.

51 of 51

jurisdictions validated

Contract engine passes all 50 states plus DC, tested end to end.

HIPAA

aligned security

Encryption, audit logging, MFA, and role-based access, built in from day one.

HOW IT WORKS

From first tap to signed contract.

01 Tap Palm It

Open the app, pick a client, hit record. The assessment conversation is the input.

02 AI pipeline runs

Transcribe → speakers → billables → notes → contract. Every step tracked and reviewable.

03 Review & send

State-compliant agreement drafted with rates and services. Export DOCX, email, or print.

04 CRM updates itself

Urgency tags, payer type, diagnosis, and contacts. Every client organized automatically.

WEB PLATFORM

A full agency CRM, built for home care.

- ✓ **Dashboard & analytics**
Assessment trends, weekly activity, conversion funnel.
- ✓ **Deals pipeline**
Kanban from intake → assessment → proposal → active client.
- ✓ **Client CRM by payer**
Segmented by Medicaid, Medicare, and private pay.
- ✓ **One-click contracts**
AI-populated template with DOCX export, email send, or print.

MARKET

A massive market at the intersection of AI and home-based care.

\$343B**U.S. digital health market**

Growing fast as care shifts from institutions to the home.

\$36.7B**healthcare AI today**

The fastest-growing segment in health tech.
PALM sits directly at this intersection.

OUR WEDGE**35,000****U.S. home care agencies**

500 agencies, just 1.4%, puts PALM at \$2.7M ARR by end of 2027.

Home care is the fastest-growing healthcare segment, and it is still completely unserved by AI-native software.

COMPETITION

Built for home care from day one, not retrofitted from an EHR.

Capability	Legacy EHRs	WellSky & AxisCare	PALM
AI voice assessments	×	×	✓
Auto contract generation (50 states)	×	×	✓
Visit-to-contract in minutes	×	×	✓
Multi-payer support	Limited	Limited	✓
Unified platform (replaces 3 to 5 tools)	×	Partial	✓
Field-first mobile app	×	Partial	✓

BUSINESS MODEL

B2B SaaS. Live pricing, billing today.

Annual billing saves 20%+

Starter

\$199 per month

20 AI assessments · 5 team members · voice-to-contract · SOAP notes · reporting

blended ARPU per month

~75%

gross margin, net of Apple fees

\$800

CAC · founder-led sales

~2.4 mo

CAC payback

~14:1

LTV : CAC at 3% churn

WHY NOW

AI just made this possible. The market can't afford to wait.

2026

LLMs, voice AI, and document automation are finally production-ready and cheap enough to embed in vertical SaaS. Three years ago the AI behind PALM's pipeline didn't exist at viable cost. **That window just opened, and PALM is already through it, live in market.**

10,000**Americans turn 65 every day**

Through 2030. Home care is the fastest-growing healthcare segment, and it's overwhelmed.

Payers**push care into the home**

Medicaid and Medicare Advantage actively incentivize home-based care over institutions.

Staffing**crisis forces automation**

Agencies can't hire their way out of admin burden. AI automation is now existential.

FINANCIAL PROJECTIONS

A conservative path to \$2.7M ARR.

KEY ASSUMPTIONS

Blended ARPU	\$449 monthly
--------------	---------------

Tier mix	60% · 30% · 10%
----------	-----------------

Gross margin (net of Apple)	~75%
-----------------------------	------

Monthly churn	3%
---------------	----

CAC (founder-led + inbound)	\$800
-----------------------------	-------

500 agencies is 1.4% of 35,000 U.S. agencies, a lower penetration assumption than most vertical SaaS models.

ROADMAP

Shipped. Now we scale.

● SHIPPED

2026 · Launch

- ✓ iOS app live with subscriptions
- ✓ Web CRM in production
- ✓ Full AI pipeline shipping
- ✓ 50-state contract engine
- ✓ HIPAA-aligned security
- ✓ Go-to-market engine live

Q4 2026

First 40 agencies

- Close \$250K seed
- Founder-led sales sprint
- Onboarding playbook
- SOC 2 Type I underway

H1 2027

Scale what works

- First AE and CS hires
- Onboarding automation
- Referral engine live
- 180 agencies · ~\$970K ARR

H2 2027

Series A ready

- 500 agencies · \$2.7M ARR
- Team of 7
- SOC 2 complete
- Category leadership

WHAT THIS ROUND DELIVERS

- ✓ **40 paying agencies** by EOY 2026 (~\$216K ARR run rate)
- ✓ **SOC 2 Type I** certification complete
- ✓ **First AE and onboarding hires** to scale founder-led sales
- ✓ **18 months of runway** to Series A metrics on the \$2.7M ARR path

Product risk is retired. The platform is live. This round funds distribution.

TEAM

Built and launched by someone who lived the problem.

Muse Ibrahim
Founder & CEO

- **Software engineer** who designs, builds, and ships product end to end.
- **Experienced sales professional** who prospects, pitches, and closes B2B deals directly.
- **9 years in the home care industry**, living the exact problem PALM solves.

KEY HIRES WITH THIS ROUND

**Engineer**

Owns the AI engine and platform architecture as usage scales.

**Sales Executive**

Experienced in B2B sales to scale what founder-led sales proves.

**Marketing Specialist**

Owns content, campaigns, and the inbound pipeline of agency owners.

PALM

The operating system for modern home care.
