PALMCARE AI

This is just the beginning of something big.

Muse Ibrahim · Founder & CEO · invest@palmtai.com

Seed Round · $450,000

PROBLEM

Home care is still running on outdated tools and manual processes.

Proposals & Contracting

Proposal and contracting phases can be long and tedious. 40–60% of staff time is lost to documentation, billing, and manual paperwork.

Slow Assessment to Onboarding

Assessment to onboarding is slow, manual, and inconsistent across caregivers a major bottleneck to growing the business.

Outdated Home Care CRMs

Home care CRMs are outdated and agencies rely on 3–5 disconnected tools with no integration between billing, scheduling, and clinical records.

Billing Errors & Revenue Loss

Billing errors and claim denials cause significant revenue loss and compliance risk costing agencies thousands every month.

SOLUTION

One platform that replaces 3–7 tools and automates the entire agency workflow.

AI Assessment Tool

Automates intake, evaluates care needs, and instantly generates billables, care plans, and draft contracts reducing assessment time from hours to minutes with accuracy.

Home-Care Focused CRM

Built for home-care agencies serving multiple payer types. Centralizes client records, caregiver management, insurance details, authorizations, and scheduling giving owners complete operational visibility.

Automated Documentation

Creates billables, ADL logs, visit notes, compliance forms, and service contracts automatically. Converts voice commands into structured documents cutting admin workload by 60–80% and reducing documentation errors.

Seamless Workflows

End-to-end automation from referral → assessment → contract → authorization → care delivery → billing across Medicaid, Medicare, managed care, and private-pay clients. Smart task routing and alerts keep operations moving and revenue flowing.

A massive, underserved market at the intersection of AI and healthcare.

$343.2B

U.S. Digital Health Market

The full addressable market for digital health growing rapidly as care shifts to home-based models.

$36.67B

Healthcare AI Market Today

Fastest-growing segment in health tech PalmCare sits directly at this intersection.

2%

of 35,000 U.S. Agencies by 2027

700 agencies = $3.35M ARR · $280K MRR at $399/mo blended ARPU (50% mobile app / 50% full platform)

Target: 700 agencies (2% of 35,000 U.S. agencies) by end of 2027 = $3.35M ARR · $280K MRR at $399/mo blended ARPU Avg. $399/mo per agency.

COMPETITIVE LANDSCAPE

Built for home care from day one not retrofitted from general EHR.

Feature	Legacy EHRs	WellSky / AxisCare	PalmCare AI
AI Voice Assessments	×	×	✓
Auto Contract Generation	×	×	✓
Multi-Payer Support	Limited	Limited	✓
Voice-Powered Operations	×	×	✓
Unified Platform (3–7 tools)	×	Partial	✓
Field-Use Mobile Interface	×	Partial	✓

B2B SaaS sold directly to home care agency owners.

How the model works

B2B — Agency pays monthly

Home Care Agency owners are the customer. The owner not the patient or caregiver is the subscriber. One fee covers the whole team.

SaaS — Flat monthly subscription

Two tiers: Mobile App $299 · Full Platform $499. Assessments included in plan; enterprise adds per-assessment overages at $8 each.

NRR — Revenue grows automatically

Revenue grows as agencies scale assessments and upgrade tiers with per-assessment overages compounding NRR. Operational lock-in keeps churn structurally low.

Pricing tiers

Mobile App — **$299 / mo**

AI assessments · voice docs · lite CRM · automated follow-ups · unlimited seats

Full Platform — **$499 / mo**

Everything in Mobile + full CRM · ADL logs · payer workflows · unlimited seats ★ Most Popular

Enterprise — **Custom pricing**

Full platform · multi-location · dedicated CSM · +$8/extra assessment

Vertical SaaS B2B · Blended ARPU $399/mo · 82% gross margin · 700 agencies by 2027 = $3.35M ARR · $280K MRR

HOW IT WORKS

From first tap to signed contract — fully automated in the field.

01

Open PalmCare AI

Open the app. Select a client or start fresh — you're one tap from recording a full assessment.

02

Tap Palm It

Hit record. Live Transcription, Speaker ID, and Auto Contract run automatically. AI handles the rest.

03

AI Pipeline Runs

Transcribe → Speakers → Billables → Notes → Contract. Every step tracked, reviewable, exportable.

04

Clients & CRM

AI urgency tags, payer type, diagnosis, and contact info — every client organized and searchable.

WEB APP CRM

Full-featured agency CRM, built for home care.

Dashboard

Assessments trend, pipeline, weekly activity, conversion funnel

Deals Pipeline

Kanban tracks Intake → Assessment → Proposal → Active Client

Client CRM

Segmented by Medicaid, Medicare, and Private Insurance payer type

Contract Generation

AI-populated template with DOCX export, email send, or print — one click

WHY NOW

AI just made this possible. The market can't afford to wait.

The AI Inflection Point

2025

LLMs, voice AI, and document automation are now production-ready and cheap enough to embed in vertical SaaS. Three years ago, the AI required to power PalmCare's assessment engine, voice documentation, and auto-contract generation simply didn't exist at a viable cost. That window just opened and home care is still completely unserved by it.

Demand Surge

10,000 Americans turn 65 every day through 2030. Home-care agencies are the fastest-growing healthcare segment and they're overwhelmed.

Payer Pressure

Medicaid and Medicare Advantage are actively incentivizing home-based care over institutions. Agencies handling more volume with the same broken tools.

Staffing Crisis Forces Automation

Severe caregiver shortages mean agencies can't just hire their way out of the admin burden. AI-powered automation has shifted from nice-to-have to existential.

Conservative path to $3.35M ARR by end of 2027.

Key assumptions

700 agencies	2% of 35,000 U.S. agencies by EOY 2027
50/50 mobile/platform	50% mobile app / 50% full platform
$399 blended ARPU	Blended MRR per agency across tier mix
82% GM	Gross margin/ SaaS-standard infrastructure costs
<3% churn	Structurally low due to operational lock-in
$800 CAC	Primarily direct sales + inbound referrals

ROADMAP

From funded seed to $3.35M ARR — 700 agencies by end of 2027.

Q1 2026
Now → Launch

Build & Ship

Finalize MVP: AI assessment engine, contract generation, core CRM, automated documentation, caregiver clock-in.

Q2 2026
Launch

Paid Launch

Go live with all 3 plans. Onboard first 25 paying agencies. Ship authorization engine and mobile app.

Q3 2026
Seed Close

Raise & Scale

Close $450K seed round. Build Medicare Advantage workflows. Ship billing prep + claims export.

Q4 2026–2027
Growth

Team & Revenue

Hire engineering lead, 2 engineers, sales AE + SDR, onboarding specialist. Scale to 700 agencies = $3.35M ARR by EOY 2027.

THE ASK

Raising $450,000 Seed Round

Use of Funds

45% Engineering & AI — $202,500

Senior engineer, AI model tuning, infrastructure scale

25% Sales & Marketing — $112,500

First AE, SDR, agency conference presence, content

20% Compliance & Legal — $90,000

SOC 2, HIPAA audit, Medicaid billing certification

10% Customer Success — $45,000

What this round delivers

- 25 paying agencies onboarded at launch (Q2 2026)
- $348K ARR by EOY 2026 (70 agencies)
- Full Medicaid + Medicare workflow coverage
- SOC 2 Type I certification complete
- Series A ready: $3.35M ARR 700 agencies by EOY 2027

Pre-money valuation and instrument details available on request. SAFE or convertible note preferred.

Built by someone who lived the problem.

Muse Ibrahim

Founder & CEO

Software engineer, sales professional, and home care operator. Built PalmCare AI full stack from scratch AI assessment pipeline, voice documentation engine, CRM, and payer integrations. Brings extensive B2B sales experience: prospecting, pitching, and closing agency owners directly. Deep domain expertise in caregiver workflows, and compliance.

Responsible for product, engineering, fundraising, and go-to-market.

Key hires with this round

Engineering Lead

Senior full-stack engineer to own the AI engine, CRM architecture.

Account Executive

SaaS seller with home health or health-tech background.

Onboarding Specialist

Agency onboarding, training, and early customer success. Reduces churn and increases activation.

PALMCARE AI

The operating system for modern home care agencies.

Automate the work that slows care down.
