

● LIVE ON THE APP STORE

The AI operating system for home care agencies.

Record the visit. PALM writes the rest.

Seed Round · \$250K

Muse Ibrahim · Founder & CEO · invest@palmtai.com

PROBLEM

Home care still runs on paperwork and disconnected tools.

**40–60% of staff time lost to admin**

Documentation, billing, and manual paperwork eat the workday — after every single visit.

**Days from assessment to signed contract**

Proposals and contracting drag for days. The agency that puts an agreement in front of the family first usually wins.

**3–5 disconnected tools per agency**

Legacy home care CRMs don't talk to billing, scheduling, or clinical records — owners fly blind.

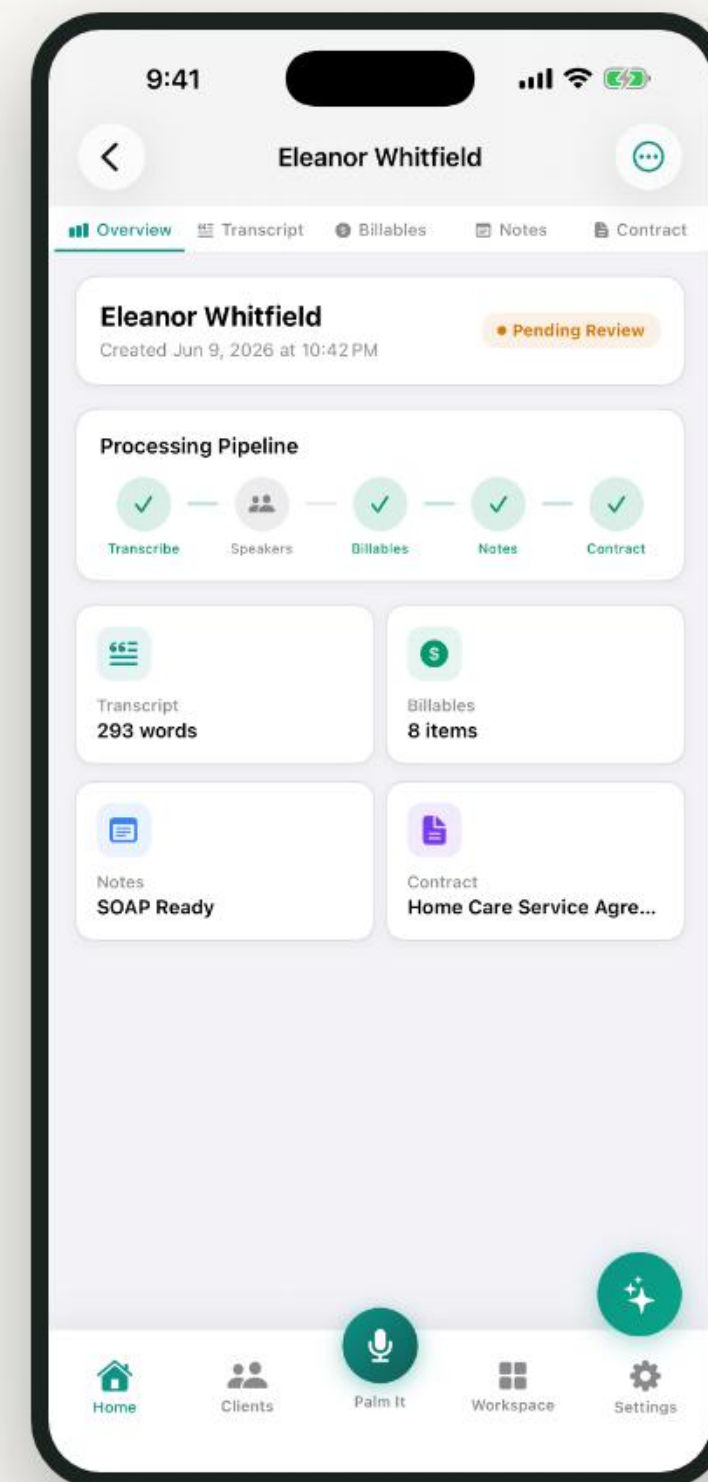

**Billing errors bleed revenue**

Claim denials and missed billables cost agencies thousands every month — plus compliance risk.

SOLUTION

The visit itself becomes the paperwork.

- ✓ **AI voice assessments**
Tap record. Live transcription and speaker ID run in the field — no forms, no laptops.
- ✓ **Automated documentation**
Transcript, billable items, and clinical SOAP notes generated from the conversation itself.
- ✓ **50-state compliant contracts**
A service agreement built on your state's contract rules — drafted in minutes, ready to sign.
- ✓ **Home-care CRM built in**
Clients, pipeline, payer types, team, and scheduling — one platform, complete visibility.

● SHIPPED · IN MARKET NOW

Not a prototype.
It's live.

Live

on the App Store

Subscriptions via Apple, 14-day free trial, no card required.

Minutes

from visit to contract

Full AI pipeline in production: transcribe → billables → notes → contract.

51/51

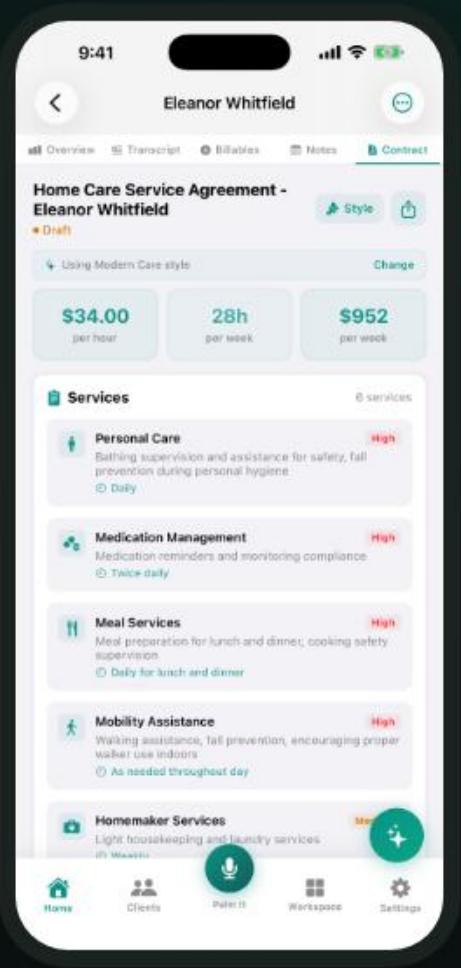

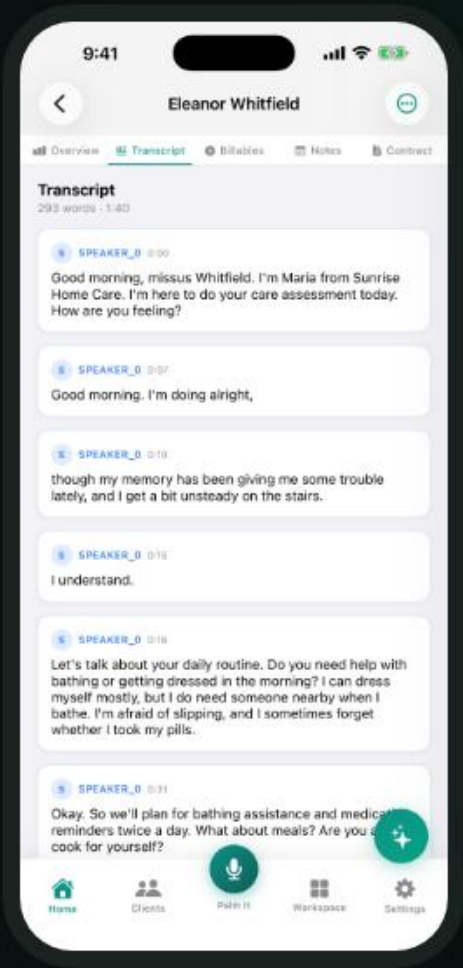

jurisdictions validated

Contract engine passes all 50 states + DC — tested end to end.

HIPAA

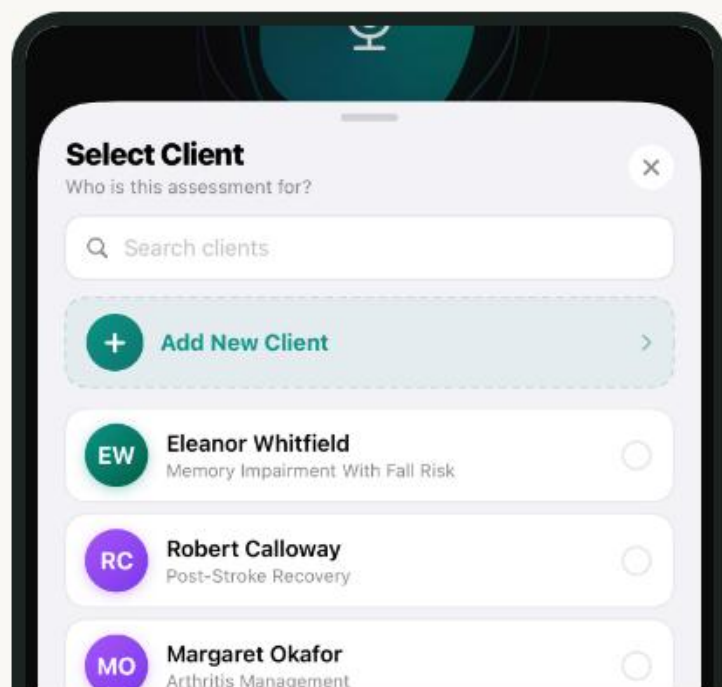

aligned security

Encryption, audit logging, MFA, and role-based access — built in from day one.

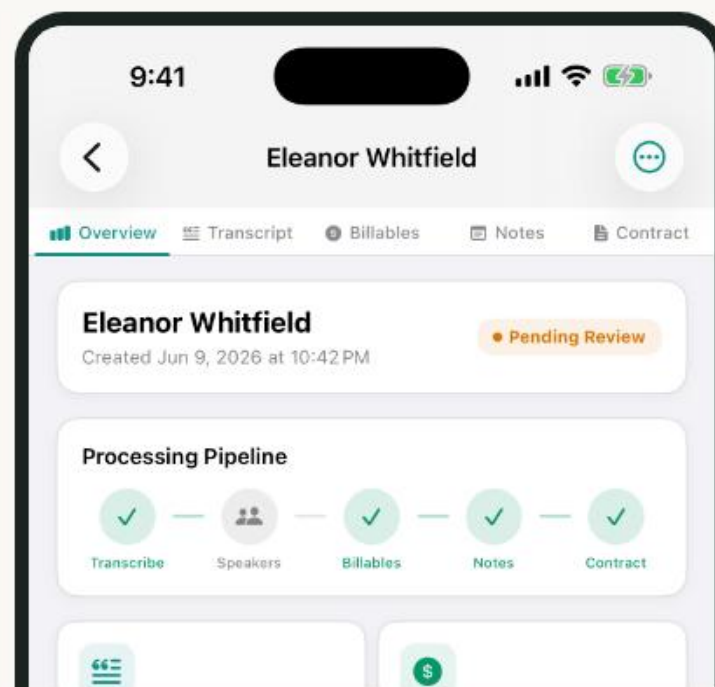

HOW IT WORKS

From first tap to signed contract.

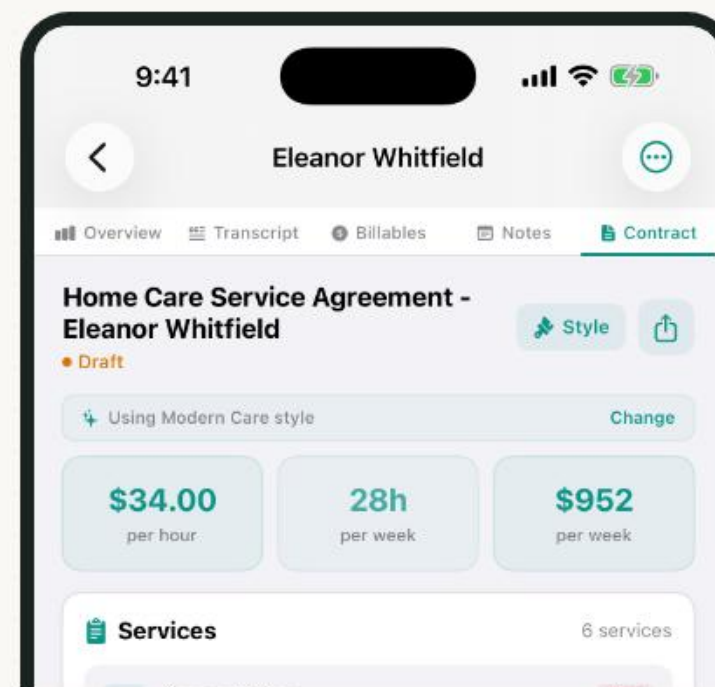

01 Tap Palm It

Open the app, pick a client, hit record. The assessment conversation is the input.

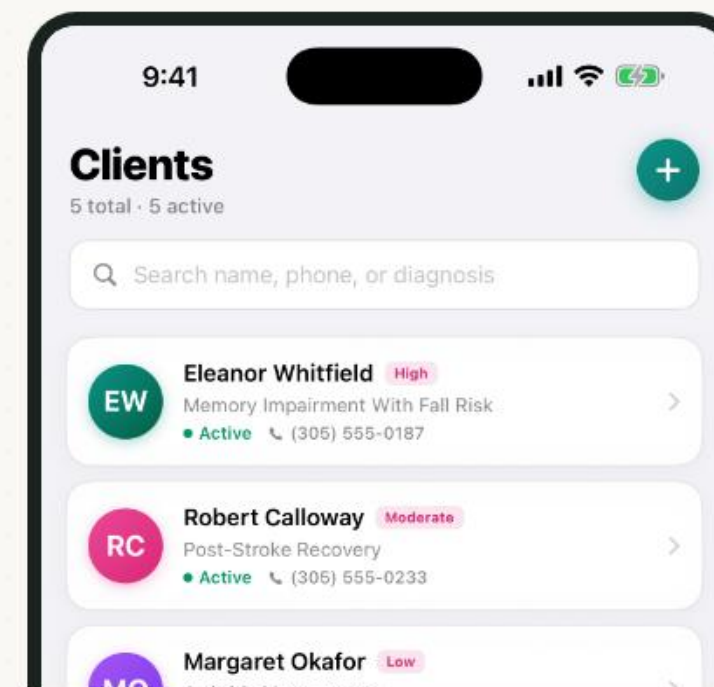

02 AI pipeline runs

Transcribe → speakers → billables → notes → contract. Every step tracked and reviewable.

03 Review & send

State-compliant agreement drafted with rates and services. Export DOCX, email, or print.

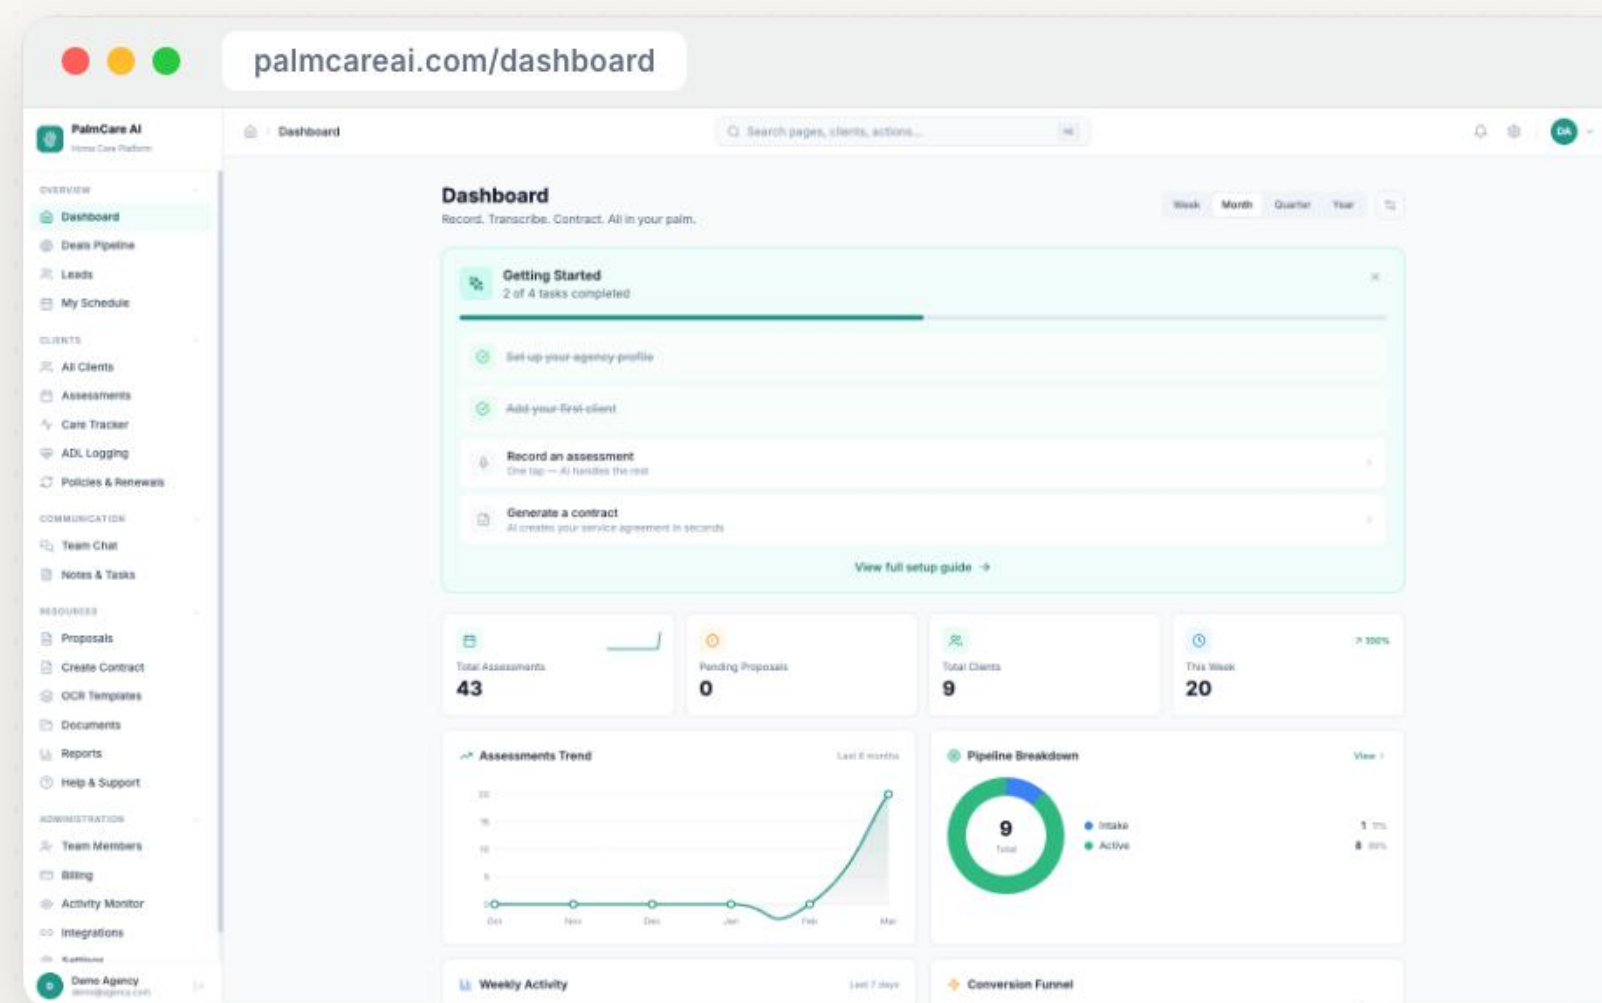

04 CRM updates itself

Urgency tags, payer type, diagnosis, and contacts — every client organized automatically.

WEB PLATFORM

A full agency CRM, built for home care.

- 
Dashboard & analytics
 Assessment trends, weekly activity, conversion funnel.
- 
Deals pipeline
 Kanban from intake → assessment → proposal → active client.
- 
Client CRM by payer
 Segmented by Medicaid, Medicare, and private pay.
- 
One-click contracts
 AI-populated template — DOCX export, email send, or print.

MARKET

A massive market at the intersection of AI and home-based care.

\$343B**U.S. digital health market**

Growing fast as care shifts from institutions to the home.

\$36.7B**healthcare AI today**

The fastest-growing segment in health tech. PALM sits directly at this intersection.

OUR WEDGE**35,000****U.S. home care agencies**

500 agencies — just 1.4% — puts PALM at \$2.7M ARR by end of 2027.

Home care is the fastest-growing healthcare segment — and still completely unserved by AI-native software.

COMPETITIVE LANDSCAPE

Built for home care from day one — not retrofitted from an EHR.

Capability	Legacy EHRs	WellSky / AxisCare	PALM
AI voice assessments	X	X	✓
Auto contract generation (50 states)	X	X	✓
Visit-to-contract in minutes	X	X	✓
Multi-payer support	Limited	Limited	✓
Unified platform (replaces 3–5 tools)	X	Partial	✓
Field-first mobile app	X	Partial	✓

BUSINESS MODEL

B2B SaaS. Live pricing, billing today.

Annual billing saves 20%+

Starter**\$199** /mo

20 AI assessments · 5 team members · voice-to-contract · SOAP notes · reporting

MOST POPULAR**Growth****\$699** /mo

blended ARPU / mo

~75%

gross margin, net of Apple fees

\$800

CAC · founder-led sales

~2.4 mo

CAC payback

~14:1

LTV : CAC at 3% churn

WHY NOW

AI just made this possible. The market can't afford to wait.

2026

LLMs, voice AI, and document automation are finally production-ready and cheap enough to embed in vertical SaaS. Three years ago the AI behind PALM's pipeline didn't exist at viable cost. **That window just opened — and PALM is already through it, live in market.**

10,000**Americans turn 65 every day**

Through 2030. Home care is the fastest-growing healthcare segment — and it's overwhelmed.

Payers**push care into the home**

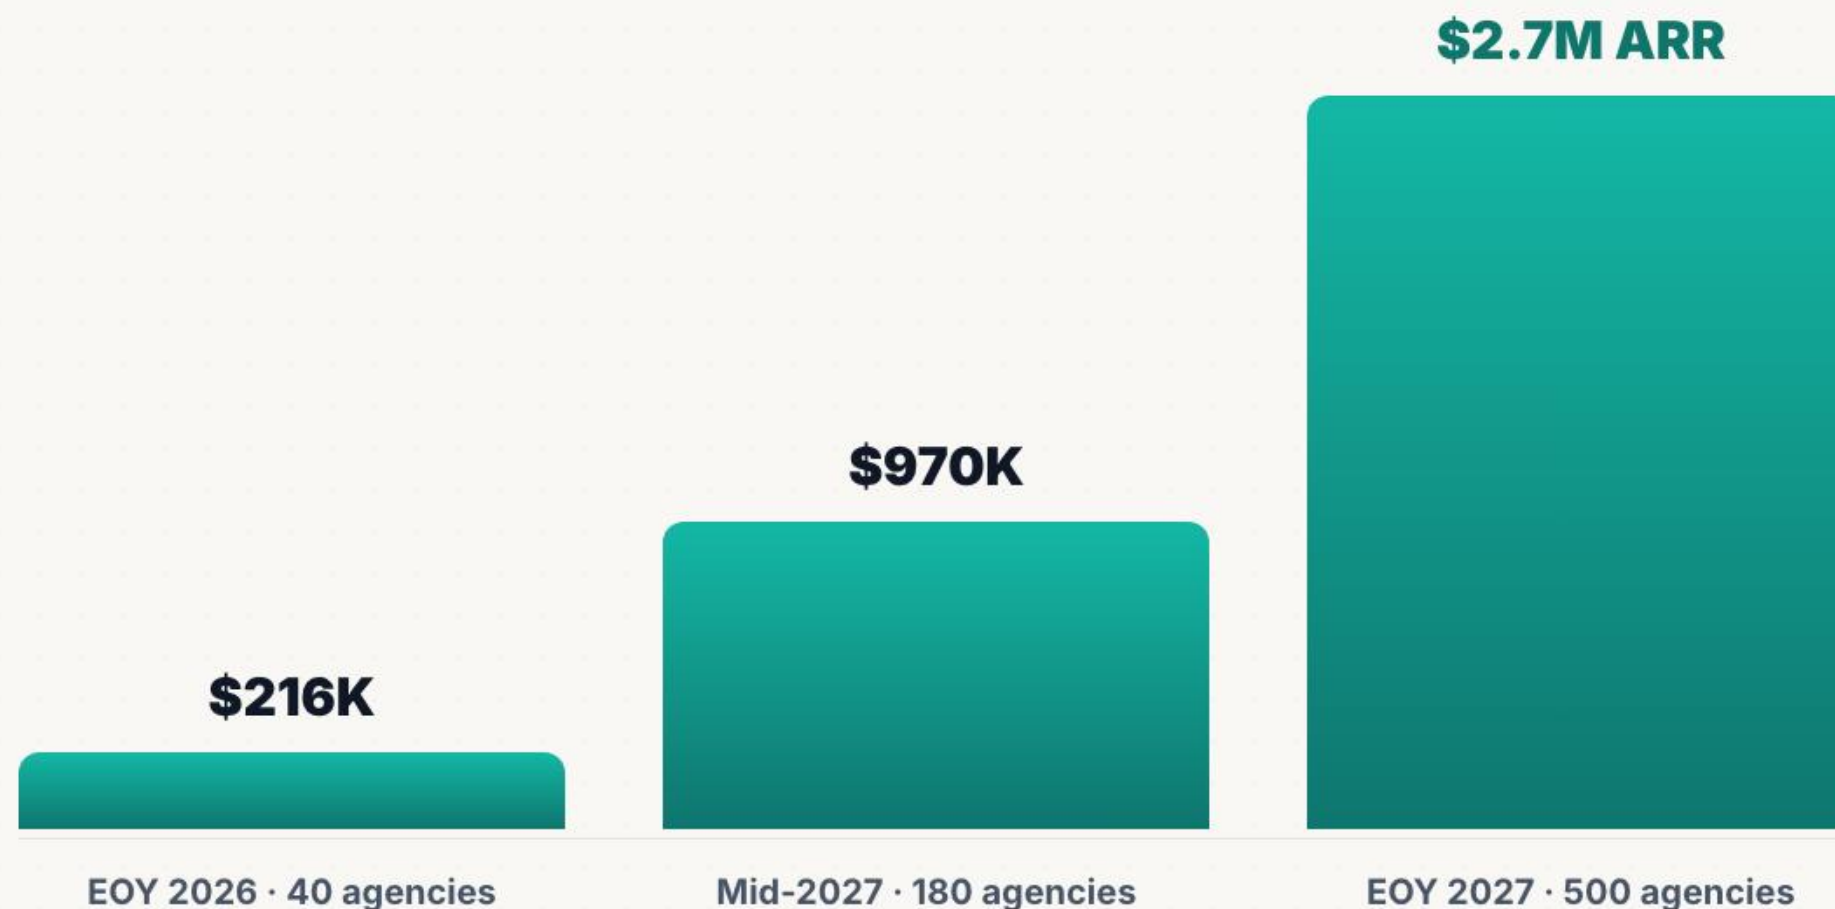

Medicaid and Medicare Advantage actively incentivize home-based care over institutions.

Staffing**crisis forces automation**

Agencies can't hire their way out of admin burden. AI automation is now existential.

FINANCIAL PROJECTIONS

A conservative path to \$2.7M ARR.

KEY ASSUMPTIONS

Blended ARPU	\$449/mo
Tier mix	60 / 30 / 10
Gross margin (net of Apple)	~75%
Monthly churn	3%
CAC (founder-led + inbound)	\$800

500 agencies = 1.4% of 35,000 U.S. agencies — a lower penetration assumption than most vertical SaaS models.

ROADMAP

Shipped. Now we scale.

● SHIPPED

2026 · Launch

- ✓ iOS app live with subscriptions
- ✓ Web CRM in production
- ✓ Full AI pipeline shipping
- ✓ 50-state contract engine
- ✓ HIPAA-aligned security

Q4 2026

First 40 agencies

- Close \$250K seed
- Founder-led sales sprint
- Onboarding playbook
- SOC 2 Type I underway

H1 2027

Deepen the moat

- Medicaid + MA workflows
- Billing prep & claims export
- First AE + CS hire
- 180 agencies · ~\$970K ARR

H2 2027

Series A ready

- 500 agencies · \$2.7M ARR
- Team of 7
- SOC 2 complete
- Category leadership

WHAT THIS ROUND DELIVERS

- ✓ **40 paying agencies** by EOY 2026 (~\$216K ARR run rate)
- ✓ **SOC 2 Type I** certification complete
- ✓ **Medicaid + Medicare Advantage** workflow coverage
- ✓ **18 months of runway** to Series A metrics — \$2.7M ARR path

Product risk is retired — the platform is live. This round funds distribution.

TEAM

Built — and launched — by someone who lived the problem.

Muse Ibrahim
Founder & CEO

Software engineer, B2B sales professional, and home care operator. Single-handedly built **and shipped** the entire platform — AI assessment pipeline, voice documentation engine, iOS app, CRM, and the 50-state compliance engine — from first commit to the App Store. Sells the product the same way he built it: directly, to agency owners.

Owns product, engineering, go-to-market, and fundraising.

KEY HIRES WITH THIS ROUND

**Founding Engineer**

Owns the AI engine and platform architecture as usage scales.

**Account Executive**

SaaS seller with home health background — scales what founder-led sales proves.

**Onboarding Specialist**

Agency training and activation — keeps churn structurally low.

PALM

The operating system for modern home care.
