

WHAT IS PALMCARE AI

Talk through the visit. Walk away with *the contract*.

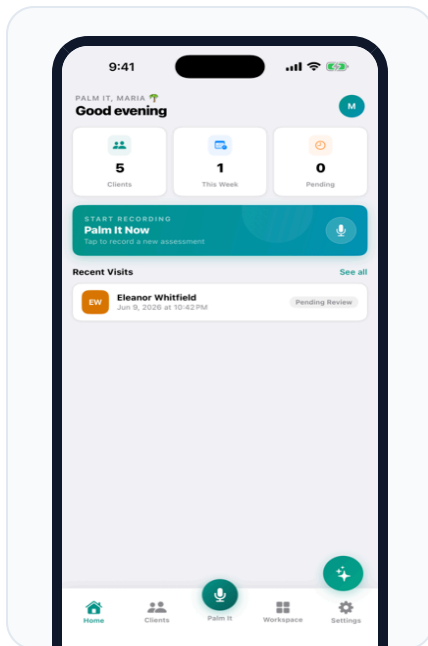

PalmCare AI listens to the care assessment and turns it into a transcript, billables, care notes, and a signed service agreement. Caregivers care more and type less. Your agency never loses a client to paperwork.

Record It

Contract It

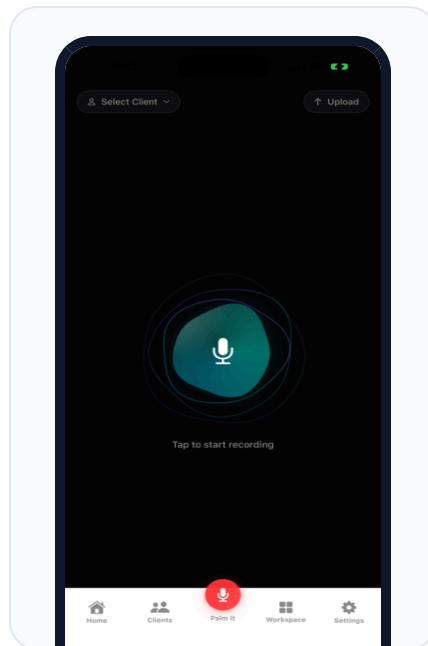

How it works

1

Record

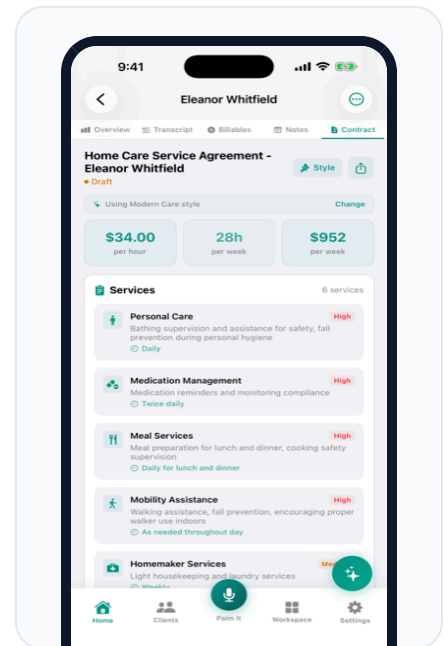

Open the app and tap Palm It. The visit records hands-free while you stay present with your client.

2

Transcribe

AI writes the transcript live and flags vitals, conditions, and care needs as they come up.

3

Contract

A ready-to-sign service agreement, priced and itemized for you — state-specific for all 50 states.

Smarter. Safer.

Care more, type less

Notes and contracts write themselves. Two hours of nightly paperwork — gone. You get your evenings back.

Never miss a detail

Vitals, conditions, and risk surface live during the visit — built from what was actually said.

Never lose a billable

Every service mentioned becomes revenue. Billables are extracted and itemized automatically.

Built on trust

Your data stays yours. Audio, transcripts, and contracts are encrypted in transit and at rest — and you stay in control.
